

RBMTX-Ux1

Anywhere you go

The RBMTX-Ux1 is a small modem made for wireless m2m applications. It is a compact device with all the standard interfaces powered by the new Telit UL865 embedded engine. Supporting GPRS/EDGE/UMTS it is dedicated for users seeking for easy and fast mobile Internet access. Internet connection is easily available and configurable via internet browser without any need of installing software or drivers for the device.

RBMTX-Ux1 is a universal solution for all low-volume M2M and mobile data applications including metering, traffic systems, transportation and logistics, security, vending machines and facility management.
